

ViaVienté

## TREMENDOUS VALUE FOR YOUR DOLLAR

Have you ever wondered what it would cost to make ViaVienté yourself?

The wholesome ingredients in ViaVienté have been hand picked for their time honored health benefits. They are carefully grown without the use of pesticides and herbicides and rigorously tested before processing. To demonstrate the **massive value** of ViaVienté, we put our team to work researching what it would take to buy each of these Super Foods yourself.

What we found is not surprising. Most cannot be purchased in your average store and even extensive internet searching could not find organic sources for some.

So we calculated the average increased 40% expense of organic food vs. typical grocery store food based on what IS available and this is what it would cost if you were to try and make ViaVienté yourself:

The amazing health benefits of each of these ingredients have been time tested and proven by science through countless clinical trials and first-hand experience. Even you may have experienced the benefits of Aloe Vera for skin, cranberry for urinary tract health or prunes for digestive function. The difficulty arises when one tries to purchase these ingredients in their fresh form and consume them regularly. Many are seasonal, cannot be purchased in stores, only come processed because they cannot be stored for long periods of time, or are completely cost prohibitive. In addition, combining them in a way that tastes good with chelated minerals AND the patented Vilcabamba Mineral Essence is impossible in a home environment.

ViaVienté solves all these problems affordably and conveniently and produces the only product on the market that is both healing (because of the amazing Super Foods) and energizing (because of the patented Vilcabamba Chelated Mineral Essence). And you get quality assurance, consistency and availability that just doesn't exist when individually trying to reproduce our amazing product.
